a

Go Omissions (%): 0  
Go Accuracy (%): 100  
Mean Go RT (ms): 795.12  
SD Go RT (ms): 68.86

b

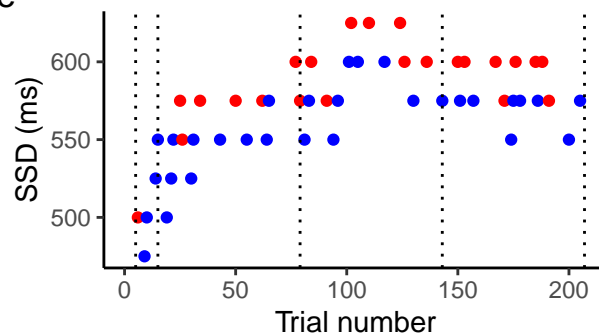

c

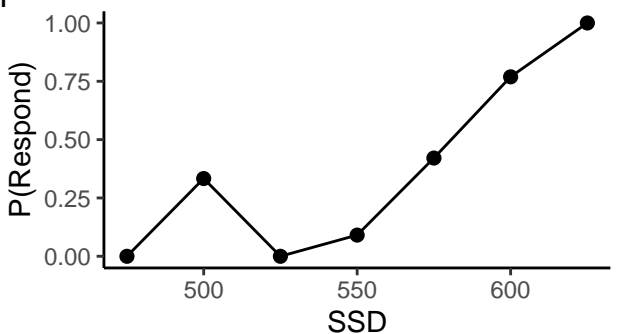

d

Mean SSD (ms): 566.04  
SSRT (ms): 232.38  
Mean Failed Stop RT (ms): 764.76  
SD Failed Stop RT (ms): 156.39

e

f

a) Descriptive statistics for Go trials. b) Go trial RTs across trials. c) Density plots for Go trial RTs. d) Descriptive statistics for Stop trials. e) SSD across trials. f) The inhibition function.

Note: The RT measures (Go RT and SSRT) are estimated with omissions errors replaced. Integration method used to estimate SSRT. See Verbruggen et al., (2019).

Blue = Successful Go or Stop trial. Red = Failed Stop trial. Dotted lines represent blocks.
